

## Educational Services

Because of its effectiveness, ease of use, and cost-effectiveness, our IronCAD™ Night Owl Training solutions are implemented by many small to large companies.

### sessions

Magnacad has instituted the “Night Owl Training Program” specifically designed for our software clientele who are either new or seasoned users. These Night Owl sessions are evening-based training classes for all our products. We have implemented night-time courses for users you cannot generally attend commonly found day-time classes. These Night Owl Sessions have gained popular acclaim amongst current enrollees and are considered more favorable than normal classes that are typically crowded and rushed.

### course structure

The courses are structured into evening courses from 7:30pm-11:00pm EST . Each class is designed to provide in-depth insight into our softwares robust and powerful functionality. We have found that many individuals purchase software and have a hard time getting started. With Night Owl Sessions, you get up to speed immediately.

### how you benefit

- A new software user can get up to speed very quickly with minimal cost.
- Your return on investment starts immediately.
- A user can attend these classes sometimes easier and fits better into schedule.
- Seasoned users can stay current with the latest enhancements.
- Access to the most experienced and seasoned instructors.

### objective

Our main intention of course, is to provide insight into our products and make customers more productive. Keep in mind also, that all night owl training is FREE to currently unemployed engineering professionals. So take advantage of these uniquely designed and operated “Night Owl Training Classes”.
