

# Educational Services

IRONCAD™  
Virtual Training

Because of its effectiveness, ease of use, and cost-effectiveness, our IronCAD™ Virtual Training solutions are implemented by many small to large companies.

## virtual classroom

Today companies depend on highly skilled employees. Magnacad's virtual classrooms adds a new alternative to education by eliminating all the wasteful costs traditionally associated with sending staff to off-site training providers. Participants experience a new level of engagement in a visually appealing and interactive on-line environment. Because employees can study live with an on-line instructor, or when it fits their schedule, the result is a more confident and highly skilled workforce.

## focused experience

Our virtual classrooms offer the easiest way to on-line training possible. Students learn within a few minutes of their first session how to navigate the controls. Students can focus on learning and not the burden of traveling, forgetting materials, being late and missing lectures.

## how you benefit ►

- Increased productivity
- Higher training effectiveness
- Reduced cost per employee
- Higher attendee satisfaction
- Instructor led or self paced
- Reduced or zero travel time
- Consistent content

## rich interactive tools

Virtual classrooms are powered by state-of-the-art our web conferencing solutions that provide a rich set of educational engagement tools for enhanced student comprehension.

## investing in education

The Virtual classroom sessions are provided in hourly increments allowing students to reduce their costs even further. Structured sessions are delivered to larger groups and are based on a daily rate.

Hourly Rate: USD \$85.00/Hr. per participant  
Daily Rate: USD \$495.00/8-Hr. per participant

\*Implement VC sessions through our Night Owl program and save 15% off standard rates. [www.magnacad.com/Training/Night\\_Owl.pdf](http://www.magnacad.com/Training/Night_Owl.pdf)
